

GSM, 3G, 4G LTE Cell Phone Professional Jammer

code: B58

B58 is the last generation [jammer for mobile phone frequencies](#). Obviously, it can block also CDMA, DCS & PCA cell phone frequencies.

Thanks to its power output, this jammer is capable of neutralizing any mobile phone signal in a range from 50 up to 100 meters.

Jammer B58 is ideal for protecting any meeting room, theater, cinema, school, etc. from disturbing or improper communications.

What is the purpose of this [jammer](#)?

1. Prevent your employees, students or spectators from using their mobile phones.
2. Block any micro bug operating on these frequencies.

Thanks to its enormous output power, it can be also employed in open space meetings, gatherings, etc. You can find further details below in the frequency chart.

USD 2.400,00

DEVICE DETAILS

Product Code:	B58
Frequency:	CDMA - GSM - DCS/PCS - 3G - 4G LTE
European Frequencies:	CDMA:850-894MHz -GSM:925-960MHz -DCS/PCS:1805-1990MHz -3G:2110-2170MHz -4G(LTE):725-770 MHz
American Frequencies:	CDMA:850-894MHz -GSM:925-960MHz -DCS/PCS:1805-1990MHz -3G:2110-2170MHz -4G(LTE):725-770 MHz
Output Power:	70 Watt
Jamming Range:	50-100 meters (depending on signal power)
Antenna Interface:	Omnidirectional
Remote Control:	NO
Battery:	NO
Power Adapter:	AC110/220V-DC27V
Color:	White
Warranty:	1 Year
